CAS INDEXING IS AVAILABLE FOR THIS PATENT.

AB This disclosure provides pharmaceutical compositions which include oil extract from plants from the Labiatae family. In particular, the compositions can be formulated by combining extracts of essential oils from plants of the Labiatae family with an organic acid or a Group I salt. It is believed that the antimicrobial activity of the pharmaceutical composition is due to the presence of organic phenols, such as isopropyl-o-cresol, in the oil extract from the plants.

CAS INDEXING IS AVAILABLE FOR THIS PATENT.

AB The present invention relates to cosmetic, nutritional or pharmaceutical compns. comprising essential oils extd. from plants and/or monoterpenes derived thereof, their metabolites and chem. related species. Said essential oils and their monoterpenes are useful in the treatment or prevention of diseases or conditions characterized by increased bone resorption, such as Paget's disease, tumor-induced bone disease or particularly osteoporosis. The invention further comprises a method for the prepn. of said compns. as well as their uses. Examples are given of the beneficial effects of essential oils and monoterpenes on bone mass in aged ovariectomized rats.

AB A novel rifamycin derivative having the formula (I): ##STR1## wherein X.sup.1 is an alkyl group with 1 to 6 carbon atoms or a cycloalkyl group with 3 to 8 carbon atoms; X.sup.2 is a hydrogen atom or an alkyl group with 1 to 4 carbon atoms; R.sup.1 is hydrogen atom or acetyl group; A is a group represented by the formula: ##STR2## wherein R.sup.2 is an alkyl group with 1 to 4 carbon atoms or an alkoxyalkyl group with 2 to 6 carbon atoms and R.sup.3 is an alkyl group with 1 to 6 carbon atoms or an alkoxyalkyl group with 2 to 6 carbon atoms, or a group represented by the formula ##STR3## wherein ##STR4## is a 3 to 9 membered cyclic amino group with 2 to 8 carbon atoms, R.sup.4 is a hydrogen atom or an alkyl

group having 1 to 4 carbon atoms, or salts thereof, a process for preparing the same and antibacterial agents containing the same as an effective ingredient.

The rifamycin derivative of the present invention having the formula (I) shows a strong antibacterial activity against the Gram-positive bacteria and the acid-fast bacteria.

CAS INDEXING IS AVAILABLE FOR THIS PATENT.

L6 ANSWER 6 OF 6 CA COPYRIGHT 2003 ACS

DUPLICATE 2

ACCESSION NUMBER: 92:203406 CA

TITLE: Study of the chemical composition of essential oils of Thymus kotschyanus growing in Azerbaidzhan and its effect on intraocular pressure

AUTHOR(S): Kulieva, Z. T.; Seidova, K. G.; Kasumov, F. Yu.

CORPORATE SOURCE: Inst. Bot. im. Komarova, Baku, USSR

SOURCE: Azerbaidzhanskii Meditsinskii Zhurnal (1980), 57(2), 11-14

CODEN: AZMZA6; ISSN: 0005-2523

DOCUMENT TYPE: Journal

LANGUAGE: Russian

AB The max. quantity of T. kotschyanus oil was accumulated during the plants's flowering phase and comprises 1.46% of the dry mass. Fifty-two components were detd. from which .alpha.-pinene [80-56-8], camphene [79-92-5], .beta.-pinene [127-91-3], myrcene [123-35-3], terpinene [8013-00-1], limonene [138-86-3], linalool [78-70-6], terpinolene [586-62-9], linalool [78-70-6], geraniol [106-24-1], geranyl acetate [105-87-3], thymol [89-83-8], and carvacrol [499-75-2] were identified. Parenteral administration of the oil results in a decrease of intraocular pressure.

AB cf. Quaderni nutriz. 12, 414(1952). Two groups of 5 rats each were  
~~injected with 50 mg. of thymol acetate or carvacrol acetate, resp., in 1~~  
~~cc. of olive oil.~~ Both groups became pregnant and carried their  
litters to normal gestation. Under the same conditions, a group of 4 rats  
was injected with 50 mg. each of guaiacol acetate (I) in olive  
oil; all were dead within 2 days. When rats were injected with I during  
the last few days of pregnancy, the litters were usually carried to term  
and all or most of the young were born alive; when I was injected during  
the earlier stages of pregnancy many of the young were born dead. The  
action of I is similar to that of o-cresol. When 50 mg. of I was injected  
in combination with 10 mg. .alpha.-tocopherol the litters were born at  
term and all the young were alive. Injection of I into male rats produced  
serious disorders of the testes and destroyed all the germinal epithelium.
